ADDRESS CORRECTION REQUESTED **RUSH — TIME DATED**

(Newsbriefs continued)

UCSF continues discussions with the SF School Board to lease the Poly High School site, to demolish the present buildings and to proceed with the University's long-standing objective of constructing housing for students and young faculty.

These discussions, if successful, would result in a lease which would allow UCSF to determine the feasibility of such a housing project.

In the meantime, campus representatives have been reporting to the community about these discussions. Tom Gwyn, director, Public Service Programs, participated in a panel discussion called by the Inner Sunset Action Committee in mid-February, answering questions about the project which, he emphasized, would be used primarily for housing, possibly also for joint campus/community uses, if it goes through. Members of the Campus Planning Committee, which includes representatives from neighborhood groups in this area, heard a presentation by Associate Administrative Vice-Chancellor Tom Rolinson, on the discussions between the School District and the campus.

For further information on the campus plans for the Poly High site, contact Tom Gwyn at x3206.

According to a recent study by UC-Irvine, commuting by yourself causes tension. The study, which followed 61 men and 39 women for more than a year, concluded that those who commute alone tend to have higher blood pressures—levels that remain throughout the day. UCSF's Transportation Services offers ridesharing to all those concerned about riding alone. For further information contact the Ridesharing Program at x1511.

The Research and Development Laboratory has a new recharge rate of $21 per hour for all technical services. This is a 5% increase due to reduced state allocations. The new rate, which is lower than comparable outside rates, was recommended by the Advisory Committee and approved by the Chancellor's Office.

There is a change in the ATSS telephone number for the UC-San Diego campus. To reach that campus dial 8, wait for the dial tone, then dial 619-452 plus the four-digit extension number. This change should be made on page five of all campus directories. This new dialing pattern will reduce the cost of calling UCSD by approximately 50 percent. For further information contact Irene Holland at x1581.

The Nuclear Medicine Section of the Department of Radiology is seeking qualified applicants for the 1983-84 Nuclear Medicine Technology Education Program. Entry requirements are a baccalaureate degree in a basic science with a grade point average of 3.0.

Nuclear medicine technology is a medical specialty concerned with the safe use of radioactive materials, primarily for diagnostic but also for therapeutic purposes. The curriculum will include radiation biology and protection, radiochemistry, physics, computer and clinical study.

The program will run 12 months starting every September. Applications are being accepted now through July. For further information contact Heather Dickson at x1521, Room S 455.

A new research project aimed at clarifying the pathogenesis of immune thrombocytopenic purpura (ITP) in adults is seeking patients with newly-diagnosed, untreated (ITP), who are willing to donate 50 to 100 ml of blood. Patients with systemic lupus or AIDS are excluded.

Physicians who have such patients are asked to contact Cancer Research Institute investigator Raphael Stricker, MD, or Marc Shuman, MD, associate professor of Medicine, at x2201 (days) or x1421 (evenings).

FAMILY PRACTICE GRAND ROUNDS: *Occupational Hazards of Health Workers.* Gail Grynbaum & Linda Morse, Center for Municipal Occupational Safety & Health. Carr Aud. 12:30 p.m.

DEADLINE

Deadline for the next issue of *Today & Tomorrow,* which will cover the time period March 26-April 8, will be **Tuesday, March 15, 11 a.m.** Please send your copy to Allen Balderson, News & Public Information Services, 532 Parnassus Ave., Rm. 300, x1541 or x2557.

Vol. 9 No. 5, March 12-25, 1983

MARCH 12-25, 1983

TODAY & TOMORROW

A report on the status of women faculty at UCSF has been submitted to Chancellor Krevans by the newly formed Chancellor's Committee on the Status of Women, and is now being discussed by the Chancellor with the vice chancellors and deans. The report summed up its findings in three conclusions:

1) The status of women faculty is virtually unchanged since 1972. Despite unprecedented growth in numbers of faculty, and despite systematic affirmative action efforts by the campus, the percentage of women on UCSF's faculty has not changed significantly during the past 10 years. The status of women faculty in tenure-ladder ranks is of special concern.

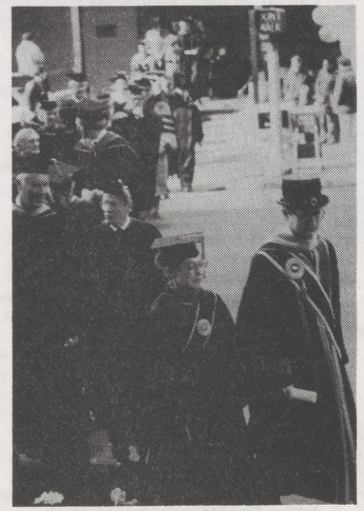

2) Women faculty are under-represented at higher academic ranks. Although women faculty hold 25 percent of all academic appointments at UCSF, only eight percent of tenured full professors are women, and only nine percent of full professors in all ladder, in-residence, clinical and adjunct title series are women.

3) Women are under-represented in academic administration. Outside the School of Nursing, UCSF has no women deans, assistant deans or department chairs. Only two women associate deans have been appointed in the other health professions schools.

The committee made the following recommendations:

1) *Recruitment:*

- List all available faculty positions regularly in the *Today & Tomorrow* calendar or by campus mail to all faculty.
- Ensure that women are appropriately represented on all search committees for ladder-rank, in-residence and administrative positions.
- Ensure that one member of every search committee is appointed to act as its affirmative action advocate, and that the Affirmative Action Office is informed who that individual is before the search begins (so that all necessary information can be made available to the advocate.)
- Publicize the campus commitment to affirmative action in the hiring of new faculty.
- Work with the professional school deans to ensure that all departmental searches provide equal opportunity for women and minority candidates.

- Work with the Vice Chancellor for Academic Affairs and the deans to provide a system of incentives for meeting affirmative actions goals.
- Work with systemwide administration to ensure that affirmative action means an active policy for the UC system and to encourage the use of campus incentives (e.g., targets of opportunity FTE) to meet affirmative action goals.

2) *Retention and Promotion:*

- Ensure that women are appropriately appointed to all ad hoc review committees for women faculty.
- Continue to provide an annual series of seminars and workshops on career advancement: criteria for promotion and tenure, grant writing, manuscript preparation, teaching methods, resources and evaluation methods. At least one of these workshops each year should be devoted to the special needs of women and minority faculty.
- Continue to provide special opportunity research and instruction grants to women and minority faculty.
- Provide a central source for campus information on career advancement and support resources.

(Continued inside)

Julius R. Krevans was installed as the fifth chancellor of UC-San Francisco March 5 in colorful ceremonies which harkened back to medieval days. Some 800 people—faculty, staff, students, alumni and friends—including leaders of some of the major academic and scientific institutions in the state and across the country, were present to see 130 members of the faculty march in academic procession across Parnassus Avenue, led by marshals Carolyn Piel and Malcolm Jendresen, to take their places in Cole Hall along with Regents, Chancellors of other UC campuses, and the speakers—UC Regent Yori Wada, John Starkweather representing the Academic Senate, William Coblentz, the UCSF Board of Overseers, Carol Copperud, staff employees, and Marjorie Bogaert, student body—who were seated on the platform.

Before the ceremony, at which President David S. Saxon placed the gold seal around the neck of the new Chancellor, the Founders Clock started a new tradition at noon of striking the hour.

Presiding over the inauguration was the chair of the UC Board of Regents, Glenn

(Continued inside)

David P. Gardner, PhD, president of the University of Utah since 1973, was chosen the new president of the University of California by the UC Board of Regents on March 2. Gardner will take office July 1, as UC's 15th president.

Gardner was selected by the Regents on the unanimous recommendation of the Board's Special Committee to Consider the Selection of a President. The committee, chaired by Regent Dean Watkins, consulted with faculty, students, staff and alumni. Gardner will replace David S. Saxon, PhD, who will become chair of the board of his alma mater, the Massachusetts Institute of Technology.

This marks the first time since 1899 that the UC president has been chosen from outside the ranks of the university; however, Gardner previously was a UC vice president from 1971 to 1973 and served both on the higher education faculty and in various administrative positions at UC-Santa Barbara from 1964 to 1970, including two years as vice chancellor of the campus.

ORTHOPAEDIC SURGERY GRAND

NEWS BRIEFS

(Status of Women continued)

- Publicize training and career opportunities for women and minority faculty.
- Publish and disseminate information on promotion and tenure criteria and processes, and grievance procedures (e.g., develop a faculty handbook for career development).
- Appoint women and minorities to appropriate campus committees.
- Nominate appropriate women and minority faculty for campus honors and awards.
- Encourage deans and department chairs to nominate women and minority faculty for membership in appropriate professional organizations and for special honors and awards.
- Develop a system of incentives for schools and departments that make special efforts to meet affirmative action goals.

3) *Monitoring:*

- Appoint a representative campus-wide committee to work with the Vice Chancellor for Academic Affairs and the Affirmative Action Officer to monitor and to evaluate faculty searches and personnel actions, and to recommend affirmative action policies on an ongoing basis.
- Ensure that existing affirmative action policies—advertising of positions, composition of search committees, reviewing of applications, preparation of report forms—are followed appropriately.
- Monitor the career advancement of women and minority faculty to ensure timely merit increases and promotions.
- Continue to collect data on recruitment, retention, and promotion of women and minority faculty.
- Collect and review comparative salary data for men and women faculty of equal academic rank.
- Collect data on women and minority faculty by department; review this information with department chairs annually.
- Ensure that the ad hoc review of department chairs emphasizes and rewards achievement of affirmative action goals.
- Develop and administer an exit interview (or questionnaire) to determine why women and minority faculty leave the University.

The Committee is chaired by Marion Nestle, associate dean, School of Medicine. Members of the subcommittee on Faculty Affirmative Action are: Rachel Bernstein, Affirmative Action; Marilyn H. Harper, Anesthesiology; Betty-ann Hoener, Pharmaceutical Chemistry; Colleen L. Johnson, Medical Anthropology; and Susan M. Pond, Medicine. Other members of the committee include: Elsa Aguilar, School of Medicine; Susan E. Browne and Agnes Canfield, School of Nursing; Elba Clemente, Personnel, Nancy Evans-Nestler, School of Nursing; Beverly A. Hall, School of Nursing; Carol Jessop, Medicine; Carolyn Koster, School of Dentistry; Pati Kuziomko, Millberry Union; Amy Levine, Rape Prevention Education; Odette Lockwood, Chaplain's Office; Elisabeth A. Neville, School of Medicine; Virginia L. Olesen, School of Nursing; Jeanne M. Phillips, Chancellor's Office; Julia Robinson, LPPI; Patricia Sparacino, Hospitals and Clinics; Diane W. Wara, Pediatrics; and Lin Yankowski, School of Medicine.

A final report has been submitted to Chancellor Krevans by the Special Review Committee for the Child Care/Study Center and now is being studied for implementation. The committee summarized its findings as:

- The UCSF Child Care/Study Center provides absolutely outstanding child care.
- The primary mission of the Child Care/Study Center is to provide the highest possible quality child care to members of the UCSF campus community.
- The center has already taken significant steps to improve its financial picture.

The committee also stated the following "guiding principles":

- The Center's child care program must be maintained at its present high standard.
- The Center's budget must be balanced.
- The financial burden of the Center must be shared by all of the parties involved; no one party should be responsible for the entire outstanding debt.

In the report the committee recommended a series of 13 steps designed to "solve the Center's present and projected financial difficulties" and "enable the Center to continue the outstanding program it has achieved in so short a time."

Members of the Review Committee were: Marion Nestle, associate dean, School of Medicine, chair; Mrs. David W. Allen, Child Care/Study Center; Allan Basbaum, Anatomy and Physiology; Peter Bloomsburgh, Hospitals and Clinics; Thomas W. Gwyn, Public Service Programs; Carol Littlejohn, School of Dentistry; Melinda Martin, Albany Unified School District Children's Center; Susan Pond, School of Medicine; Linda Prentice, Anatomy; Brenda Roberts, School of Nursing; Diane Ryken, UC Hastings School of Law Child Care Center; Thena Trygstad and Claudette Johnson, Chancellor's Office.

(Inauguration continued)

Campbell, and the inaugural address was given by Steven Muller, president of The Johns Hopkins University.

Hundreds of friends participated in other events, including 4 concurrent scientific presentations by faculty and 30 different tours sponsored by the schools of Dentistry, Medicine, Nursing and Pharmacy.

A luncheon was attended by some 400 guests, where a special drawing was held. Winners included Marie Rhodes, Academic Senate; Otto E. Guttentag, professor emeritus, Medicine; Dallas L. Tuck, professor, Chemistry and Pharmaceutical Chemistry; Richard K. Miller; Anthony Wagner, assistant director, Hospitals and Clinics; Michela Reichman, special assistant to the Chancellor; Frances Larragueta, former associate dean, School of Medicine; Robert P. Lilienthal, Hospitals Auxiliary; Robert S. Wallerstein, professor and chair, Psychiatry; and Joseph S. Spinelli, director, Animal Care Facility.

During the inauguration ceremony, Krevans delivered a brief talk in which he warned that UCSF, with its four health-oriented schools, its graduate division, its 2000 faculty and its Hospitals and Clinics, faces difficult problems in the immediate future.

Those problems, he said, include declines in financing that threaten research and service programs; changes in public attitudes that involve "a pervasive distrust of institutions"; a changing health-care system "whose future structure and resources may alter dramatically," and changes in educational programs that will almost certainly be accompanied by academic unrest.

Millberry Union will celebrate its 25th anniversary the week of April 11 with several special events including an all-campus talent show on Thursday.

Special noon events for the week will include a demonstration of outdoor adventure equipment—hang gliding and wind surfing simulation—on Tuesday in Saunders Court, a 2.1 mile Mount Sutro Run on Wednesday beginning on the steps of the Medical Sciences building, and free fitness evaluations on Thursday in Saunders Court.

The MusiCale, which also will serve as a Millberry Union benefit, will be held in the gym on Thursday, April 14, 7 to 9 p.m. It will feature several UCSF faculty, staff and students performing jazz and the classics including: Denny Zeitlin, Psychiatry; Edward Green, School of Dentistry; Peter Ostwald, Psychiatry; belly dancing by Habiba, Medicine; Douglas Colsson, fourth-year student, Pharmacy; and the "Matrix Band," made up of School of Dentistry students. Ephraim Engleman, director of the Rosalind Russell Medical Research Center for Arthritis, will serve as master of ceremonies and musical director, as well as perform on the piano.

An unveiling of a custom-woven tapestry by Bay Area artist Wendy Heunann, to be hung in the Millberry Union lounge, will precede the MusiCale.

For further information on all events and ticket information for the MusiCale call x2019.

The 1982 Troy C. Daniels Lecturer is Erminio Costa, chief of the Laboratory of Preclinical Pharmacology, Division of Special Mental Health Research, NIMH.

Costa, who is the winner of the 1982 NIH Distinguished Service Award, will be on campus the week of March 14 to deliver several lectures. For topics and locations contact Neal Castagnoli, Jr., PhD, at x2917 or x1225.

The Troy C. Daniels Lectureship is named for the former dean of the UCSF School of Pharmacy, who has been a leader in determining the course of development of pharmacy and pharmaceutical education for more than 50 years. He first came to UCSF in 1929 as an assistant professor and was dean from 1944 to 1967. The lectureship is sponsored by Barnes-Hind Laboratories.

The new Walter A. Haas, Jr. Radiation Oncology Pavilion in the new Long Hospital was formally dedicated on Monday, March 7. The dedication was preceded by a scientific symposium featuring presentations by noted members of the UCSF faculty.

The pavilion, under the direction of Theodore Phillips, MD, chair of Radiation Oncology, is one of the most sophisticated and technologically advanced cancer treatment facilities in the western US, with the capacity to treat 2,000 patients a year.

The pavilion is named for Walter A. Haas, Jr., the well-known Bay Area business and civic leader, in appreciation of funds provided by the Evelyn and Walter A. Haas, Jr. Fund. A noted philanthropist, Haas has supported a number of other programs at UCSF, including the Child Care/Study Center and the Psychiatry Department's Infant-Parent Program at SFGH.

In order to preserve and enhance the Sutro Forest, the campus is in the process of cutting down or pruning some hazardous eucalyptus trees that fell during the recent wind and rain storms. Very heavy damage—a loss of some 50 trees—came to the forest from the December 22 storm.

Over 100 5-gallon size redwoods were planted last year in the area west of Farnsworth Lane. Additional redwood trees are being planted this year, especially where trees have been lost in the Edgewood Avenue area immediately east of Langley Porter Psychiatric Institute.

For further information contact Nat Garibaldi at x1254 or Robert Falcone at x5227.

Chancellor Krevans announced with regret that George A. Evanoff has informed him that he will be leaving his position as vice chancellor, Personnel and Student Services, effective June 30, 1983.

HONORS & AWARDS

Nicholas L. Petrakis, chair, Department of Epidemiology & International Health: Invited participant, US/Japan Cooperative Cancer Workshops on "Multiple Primary Neoplasms," Oiso, Japan, Feb. 17 & 18. Sponsored by the National Cancer Institute and the National Cancer Center Hospital of Japan.

Chris Hatcher, associate clinical professor, Psychology: Board member, National Firehawk Foundation, an organization devoted to the study and prevention of juvenile fire-setting.

Ida M. Martinson, acting professor & chair, Family Health Care Nursing, School of Nursing: Institute of Medicine's Committee on Health Consequences of the Stress of Bereavement.

Barbara R. McLain, assistant clinical professor, Family Health Care Nursing, School of Nursing: President, board of directors, Southeast San Francisco Area Health Education Center (AHEC).

Robin Kramer, visiting lecturer, Physiological Nursing, School of Nursing: Interviewed on "The Today Show" regarding "Healthy Siblings of Children with Cancer," about her work as a nurse in this specialty and her loss of a brother to cancer.

Ira Herskowitz, professor, Genetics, Biochemistry/Biophysics: 1983 Eli Lilly & Co. Award in Microbiology & Immunology.

Ariah Schwartz, clinical professor, Opthalmology: Invited to Israel to receive the Landau Award for Ophthalmology from the American Physicians Fellowship for Israel.

Lily Yeh Jan, assistant professor, Physiology: Three-year $100,00 Esther A. & Joseph Klingenstein Junior Fellowship for research "using genetics to study elements important for the neuronal function of fruit flies." The fellowships are given "to encourage both clinical and basic science investigators to engage in research that may lead to a better understanding of the etiology, treatment and prevention of epilepsy."

Justine Roberts, systems librarian: Chair, statewide LAUC Ad Hoc Committee on Microcomputer Applications in UC Libraries.

IN MEMORIAM

Henry L. Silvani, former chief of Surgery, VAMC. He received his MD from the School of Medicine in 1938 and graduated at the top of his class. He also served his internship with UCSF and was chief surgical resident in 1944. He was clinical professor of Surgery at the time of his death.

Steven A. Lukes, resident, Department of Neurology from 1979 to 1982. He had recently been appointed a fellow of the Memorial Sloan-Kettering Cancer Center in NY.

APPOINTMENTS

Lee J. Mosley: Appointed acting associate university librarian, retroactive to July, 1982. He came to UCSF as a catalogue librarian in 1968 and became assistant university librarian and head of technical services in 1971. He plans to retire at the end of this fiscal year.

PUBLICATIONS

Karen Williams, postdoctoral student, Physiological Nursing, School of Nursing: Co-author, *Handbook of Enteral Nutrition: A Practical Guide to Tube Feeding* (Medical Specifics Publishing, El Segundo, CA, 1982).

Distinguished researcher Graham C. Liggins, MB, ChB, PhD, will be at UCSF Wednesday, March 23 to Tuesday, March 29, as the first William N. Creasy Visiting Professor of Clinical Pharmacology. The professorship, funded by the Burroughs Wellcome Fund of North Carolina, will be hosted by the Department of Obstetrics/Gynecology and Reproductive Sciences.

Liggins is professor of Reproductive Endocrinology at the Postgraduate School of Obstetrics and Gynecology, University of Auckland, New Zealand, and a member of the Royal Society. He will present the W. N. Creasy Memorial Lecture, "Antenatal Glucocorticoid Therapy: Induction of Human Fetal Lung Maturation," on Wednesday at noon in Cole Hall. He also will deliver a CVRI seminar on "Lung Development and Fetal Breathing Movements" on Monday, March 28, at 4 p.m. in Room S 1364.

In addition, Liggins will attend Ob/Gyn and Pediatric grand rounds and will meet with faculty, fellows and house staff in a series of informal discussions during his visit.

The W. N. Creasy Visiting Professorship is named in honor of the late president and chair of the Burroughs Wellcome Drug Company. He founded the Burroughs Wellcome Fund as a vehicle for supporting medical research in the US. Creasy, who died in 1974, was the father of UCSF's Robert K. Creasy, MD, professor of Obstetrics/Gynecology.

A native of New Zealand, Liggins has pursued a career in reproductive medicine, first through specialty training in Ob/Gyn in England and subsequently as a faculty member at the University of Auckland.
